

Dart Emission Tester For Underground Diesels

Never use gas detector tubes again for raw gas tests!

The latest automotive gas analysis equipment has now been applied to mine diesels.

The *SkillPro* DART Emission Tester allows rapid measurement of:-

Oxygen	O ₂
Carbon Monoxide	CO
Carbon Dioxide	CO ₂
Oxides of Nitrogen	NO _x
Hydrocarbons	HC

- Low maintenance
- Easy to operate
- Large digital displays
- Upgrades available
- Lightweight
- Quick operation

Power from any convenient 12V supply allows it to be used in the workshop or on the hard-stand. Its portability allows the tradesperson to examine emissions under actual driving conditions. The unit comes with attachments to cover both stationary raw gas and real time testing situations.
