

Summary Business Information for SkillPro Services Pty Ltd

Business Scope

SkillPro Services Pty Ltd (SkillPro) provides solutions to technically based problems faced by mining companies, and where appropriate, other organisations in the resource industry chain.

Business in action

SkillPro has 3 fundamental business streams

1. A research and consulting stream which develops solutions to problems for individuals or like-minded consortiums. We specialise in problem-specific research, one-on-one consulting, technical training, “mentoring” during projects. Our major areas of expertise include;
 - ❖ Explosion detection and protection
 - ❖ Fire detection and suppression (including spontaneous combustion)
 - ❖ People Risk and infrastructure management
 - ❖ Diesel engine systems including unique emission control for mines
2. A product stream, which takes products developed by in-house or external research, and promotes/provides them to local customers. Products being sold locally and internationally, plus under development, include;
 - ❖ Bagged barrier system for dust explosion protection in underground coal mines
 - ❖ Portable diesel emission gas analysers
 - ❖ Fenzy brand fire and self-rescue apparatus
 - ❖ Re-useable active (auto triggered) dust explosion barriers for coal mines
 - ❖ Electronic, diesel engine management control units
3. A service stream, which services equipment provided by SkillPro or others. Equipment being regularly serviced includes;
 - ❖ Portable and fixed gas analysers used by mines, councils etc
 - ❖ Self-contained and emergency breathing apparatus used by miners, ship crews, fire services etc

Locations

SkillPro operates from premises in Emerald and Brisbane.
